# NETATMO presents : Lauren!

Lauren works at Netatmo as a **Frontend Developer.**
She studied engineering at ECE Paris and spent several months studying abroad in Montreal.

## What does she do?
Lauren works on Netatmo's webapp which enables users to control and visualize the data of our connected objects.

## How does she work?
Lauren works on several projects, She needs to plan her day and prioritize what she has to do, but she must be flexible as her planning can change if she has any emergencies to correct.

## Why is it interesting for her?
- She works on a daily basis with our devices, such as our Connected Thermostats and Valves in order to test and develop her app.
- Team work! Lauren also works with other teams for her projects.

Every Thursday at 11am, she has a team meeting so everyone is up to date on the ongoing projects. Together, they solve any emergencies coming from the Customer Support Service or Product Managers.

## NETATMO

**A Frontend Developer at Netatmo** is a programmer who codes the front end of our innovative website for our customers.

Her daily routine at Netatmo:

At around 10am :
*"I have a coffee break with my colleagues, when we share croissants and other pastries."*

At lunch time :
*"I eat in our cafeteria or I do sport with my workmates. (Running, CrossFit…)"*

At around 4pm :
*'"We have a break to play ping-pong."*

*– Lauren*
