

Job Profiles Internetpeople

Company profile:

The fast growing Austrian company **Internetpeople** (www.internetpeople.at) is specialized in homepage programming, creative web design and social media. The company's mission is to develop individual and creative solutions, adapted to their customers' needs. The company would like to enlarge its team and therefore offers several positions.

Positions:

- DOT NET developer / programmer up to 10 people
- JAVA developer / programmer up to 10 people
- Project manager 2 people
- SAP developer up to 10 people
- SAP programmer up to 10 people
- SAP tester up to 10 people
- ORACLE developer up to 10 people
- ORACLE Admin up to 10 people
- DB 2 (IBM) up to 3 people
- DB 2 (IBM) Z-Series up to 5 people
- project manager for a big web project (for a big company group with Europe-wide presence)

Field of work: telecommunications, ministries, finance, administration, car-industry

Place of work: Austria, Germany, Switzerland

Required profile:

- Proven knowledge of the programming language related to the position
- Fluent English mandatory
- Good German language skills would be an advantage

Terms and Conditions:

The position is offered for 12 months.

Long-term employment can be expected. Most of the projects will take more than one year. In the majority of the cases, a new contract will be signed up before the current one ends.

Type of contract:

Depends on the projects, sometimes full-time employment (labor agreement) - sometimes corporate agreement (per hour)
