

# Software Developer

## Company profile:

ProSolution GmbH ([www.prosolution.com](http://www.prosolution.com)) is a leading provider of web-based software for temporary employment agencies. Long experience and innovative solutions make ProSolution a competent and reliable software-partner for national and international clients. Confidence, high regard and reliability characterise the team and the business culture.

ProSolution is looking for a Software Developer to join its team and offers challenging and interesting responsibilities in a nice and friendly team, the security of a renowned company and possibilities of further training. After a brief period of training in Austria (6-12 months), the candidate might be transferred back to Spain (Madrid), where he/she would continue to work for ProSolution from their home country.

## Job description:

- Develop new features and modules within a team
- Create and codify prototypes, test concepts, structures...
- Analysis of the legacy code regarding structure, performance, maintainability
- Take part in the process of technical design

## Required profile:

- Degree in computer engineering or several years of experience in software development
- Extensive knowledge of web development techniques (HTML, CSS, JS, jQuery...)
- Expert-level knowledge of OOP concept
- Quality-minded
- Knowledge of CFML and/or Java would be an advantage
- Experience with test-driven development would be an advantage
- Technical design skills are an advantage, but not required

## Personal skills:

- Communication and team working skills
- Ability to work independently
- Pro-active
- Solution-oriented approach when resolving problems

**Type of contract:** unlimited

**Working hours:** full-time

**Salary:** Attractive salary depending on experience and qualification.
