

# Mobile Software Developer (m/w)

## Company profile:

**ProSolution GmbH ([www.prosolution.com](http://www.prosolution.com))** is a leading provider of web-based software for temporary employment agencies. Long experience and innovative solutions make ProSolution a competent and reliable software-partner for national and international clients. Confidence, high regard and reliability characterise the team and the business culture.

ProSolution is looking for a **Mobile Software Developer** to join its team and offers challenging and interesting responsibilities in a nice and friendly team, the security of a renowned company and possibilities of further training. After a brief period of training in Austria (6-8 weeks), the candidate will be transferred back to Spain (Málaga), where he/she would continue to work for ProSolution at the local office.

## Job description:

- Develop new apps
- Conduct the whole app lifecycle including software architecture, QM and Maintenance within a team
- Take part in the technical design process

## Required profile:

- Degree in computer engineering or several years of experience in software development
- Experience in mobile software development
- Expert-level knowledge of mobile development concepts and cross platform technologies like Appcelerator/Titanium or PhoneGap
- Knowledge of web development techniques
- Technical design skills
- Software lifecycle experience
- Quality-minded
- Good command of English

## Personal skills:

- Communication and team working skills
- Ability to work independently
- Pro-active
- Solution-oriented approach when resolving problems

**Type of contract:** unlimited

**Working hours:** full-time

**Salary:** Attractive salary depending on experience and qualification.

## This is your chance for a new challenge in Austria!
