

****Job Description**:**

We are looking now for a talented Python Developer with excellent skills in data manipulation and analysis. The candidate should be well-read on the latest development technologies, able to work independently, quick-to-learn and eager to absorb as much knowledge from our team as possible. You should also be able to adapt to rapidly changing projects and deal with challenges in a positive, creative way. Some of the backend technologies we use: Python, Perl, NodeJS and Java, with storage on MySQL, MongoDB and Hadoop. As for frontend: Python and PHP with MySQL persistence and Javascript (jQuery / Bootstrap / Angular). Contract is permanent, after a 3 month probationary period. Salary range £22,000 to £28,000. Assistance with relocation to Gibraltar can be provided. Typically the employee will reside in Spain (La Linea de La Concepcion) and cross the border every day to go to work.

****Requirements****

- * Proficiency with Python
- * Proficiency with Object-Oriented Design and Design Patterns
- * Solid knowledge of SQL and experience in data manipulation
- * Knowledge of Subversion (or other CVS)
- * Good Linux knowledge

****About the company****

We are a small, highly creative team coming from a wide range of disciplines, focused on transactional marketing. Our HQ is in sunny Gibraltar, an emerging gaming and online marketing hub.

****What Python is used for**:**

Some typical tasks:

- * Writing ETL / Data Aggregation / Map Reducers
- * Building High-concurrency Web Services
- * Improving Data/Web Scrappers
- * Improving Semantic Web / Sentiment Analysis Modules.
- * Implementing Machine Learning / Data Analytics Methods
