

We are a Spanish company dedicated to consumer electronics. We design, manufacture and distribute multimedia devices (smartphones, tablets and e-readers), 3D printers and educational robotics kits.

Our passion for technology, the constant innovation and offering a great customer service are our identity signs. Join a young and dynamic company that gathers more than 1000 professionals of 25 different nationalities spread out in our headquarters in Spain, China, France and Germany.

We are looking for a **Junior Data Scientist**

### **Essential Duties and Position Responsibilities**

As a Data Scientist at bq you will help steer the improvements of our products, give strategy perspective to our teams, and provide business understanding to the organization based on your data analysis.

- Collect and manage large data sets to perform complex data analysis
- Work as part of a multi-discipline product development team
- Transform data into insights to identify & quantify business opportunities
- Communicate the results and their implications to the business stakeholders
- Have the capacity to adapt to our fast-paced environment while generating innovative solutions

### **Required Skills**

- BSc, MSc or PhD in Computer Science, Statistic, Math, or comparable field
- Experience using data mining techniques, and solving analytical problems
- Knowledge of Perl, Python, VisualBasic language and/or other programming languages
- Excellent English communication skills (written and verbal).
- Commercial attitude and interest, with strong business understanding
- Currently living in Madrid or prepared to relocate in Madrid

### **Job Conditions**

Financial Assistance: 750 € from 9.00 to 18.00
