

Course One-Pager: Supply Chain Execution and SAP Transportation Management

Description: SCE & SAP Transportation management
Level: Bachelor
Language: English/ Spanish

Overview course

Supply Chain Execution (SCE) often refers to software that is used to control and manage processes related to warehousing, transportation, global trade and visibility throughout the supply chain. This course aims to present and discuss real-life business examples in the field of SCE, and more specifically, the role and value of SAP software therein. The course offers a short introduction of the SAP software landscape and will focus in detail on SAP Transportation management and how it's implementation adds value for Logistic Service Providers as well as other customers, for example in the retail business. Conducted by experienced consultants, the course will also give an insight into project lifecycles in implementation projects.

Learning outcomes and course objectives

- Identify the components of SAP Software in Supply Chain Execution processes
- Evaluate and compare theoretical knowledge in SCE with real-life business examples
- Understand the elements and purpose of the SAP Transportation Management module
- Describe an implementation cycle of a SAP Transportation management project
- Solve a typical business case in the context of an implementation project of SAP Transportation management

Course outline lectures:

- Intro Session – Business vs. Software Solutions – Value Proposition Consulting Services
- Business Scenario Overview, Customer Examples in LSP & Retail environments
- Software Overview – Solution, Trends SAP (Hana, ERP to S4)
- Training SAP TM – Logistics (Overview, Object Model, Modules, Architecture)
- Project Lifecycle, Global Opportunity

Teaching method: Lectures/ Tutorials, Self-study
Assessment: Group assignment, Individual assignment
Lecturer: Experienced Novigo senior consultants and managers
Hours: 10 hrs Lecture, up to 20 hrs Assignments
Prerequisites: The course is open to all students with a background in Software Engineering & Computer Science, available for being hired as full time employees in January 2017, good English level required
