Software Development Intern

Our company "shaadow" is a software company that is revolutionizing the cybersecurity industry with a SaaS product based on a proprietary software solution that ends with document leakage. We are based in Madrid, although we have a global scope.

We are looking for a talented intern to join our software development team with the chance to renew the contract or move on to join.
We are interested in highly responsible people with a high level of motivation that will support the software development team.

We offer to join a 100% remote team, working alongside large technology companies in the field of telecommunications and IT and a flexible way of working with a culture built on trust, respect, teamwork, communication, and creativity.

Preferred Qualifications

Experience with front-end languages such as HTML, CSS, and JavaScript.
Experience with server-side languages such as Python, Ruby, Java, PHP, and .Net.
Familiarity with AWS cloud-based infrastructure.
Familiarity with database technology such as MySQL or MongoDB is a plus.
Familiarity with JavaScript frameworks is a plus.
Good problem-solving skills. Attention to detail.
Great attitude and ability to work in a fast-paced, collaborative environment is a must
Good written and spoken English and Spanish.
